Vatsal Sanjay

Thermal Engineering, Senior Year

Seeking doctorate position to continue my quest in the world of multi-phase flows

~ ~	cking doctorate position to continue				
	Research Interests				
Two-phase	o Liquid jets & their interactions	 Liquid Sheets (curtains) formation & stability 			
flow	 Computational multi-fluid dynamics 	 Interface reconstruction 			
	o Droplets & bubbles dynamics	 Boiling heat transfer 			
Fire	o Compartmental fire	 Fire propagation and soot flow 			
	Education				
2013	Integrated Dual Degree				
2018	B.Tech (Mechanical Engineering) & M.Tech (Thermal Engineering)	Indian Institute of Technology Roorkee, Uttarakhand, India Senior year student with CGPA: 8.98 /10			
2013	High School, Central Board of Secondary Education, India				
2013	AISSCE, Graduated with 96.4% marks	2011 AISSE , Graduated with CGPA of 10 /10			
	Research Experience				
2016	Research Intern				
May - July					
Supervisors:	Prof. Jean-Philippe Matas, Prof. J. John Soundar, Prof. Mickaël Bourgoin				
Project:	Numerical investigation of the Landau film entrainment and rotary entrainment • Understanding of the classical Landau-Levich film entrainment problem.

Collision of liquid jets

- Conducted full-scaled numerical simulations using Gerris, to explore the physics of liquid jet collision.
- Characterized the resultant liquid sheet using the dimensionless parameters.
- Developed an understanding of the kinematics of the fluid parcels inside the liquid sheet.
- Established an analogy between impact of liquid jets with colliding train of fluid quanta.
- Conducted experimental investigation to characterize different regimes of liquid jets impingement.

- Investigated the formation of finger-like projections as a result of Plateau-Rayleigh instability.
- Studied effects of inertia induced asymmetries in the collision of liquid jets through detailed experiments and analogy of inelastic collision of fluid quanta.
- Developed an in-house post-processing code using the gfs2oogl library and MATLAB.

2016

Multi-scale simulations

- Working on coupling of the Volume of Fluid (VOF) Lagrangian Point Particle (LPP) methodology.
- Used a hybrid method to study multi-scale phenomena, like jet atomization & bubble bursting.
- o Characterized atomization by collision of liquid jets: a result of Kelvin-Helmholtz instability.
- Future endeavor: incorporation of a novel conversion criterion, whereby a finite sized droplet or smaller fluid parcel is converted into multiple particles instead of one as in traditional LPP.

2016

Numerical simulation of the drainage of kitchen sink

- o Carried out full-scaled simulations to model the gravity assisted drainage of reservoir.
- Studied the mutual interplay of body forces and surface forces on the drainage of reservoir.
- Future endeavor: Simulation of emptying of partially filled bottles using Gerris.

2017

Phase change heat transfer

- Understanding of the phase-change model incorporated in LAMMPS-SPH multiphase solver.
- o Investigating preferential bubble pinch-off from staggered cylindrical arrangement.
- Future endeavor: simulation of nucleate boiling with dynamic contact angle.

Fire Dynamics

2014

Study of flame propagation

- Conducted three-dimensional Large Eddy Simulations (LES) using Fire Dynamics Simulator.
- Investigated compartmental fire in presence of furniture in single and multi-storeyed buildings.
- o Calculated Available Safe Evacuation Time (ASET) in case of fire hazard.
- Simulated fire inside real-life modeled railway compartments to establish critical spots.
- Studied fire propagation behavior in presence of patterned flammable obstructions.
- Investigated the effects of wind flow over fire spread in typical arrangement of bushes.

Technical Skills

CFD: Gerris, Basilisk C, LAMMPS-SPH & MD,

PARIS Simulator, Fire Dynamics Simula-

tor, OpenFOAM, ANSYS-Fluent

Languages: C, C++, MATLAB, Python, LATEX

Lab based: LabView: Voltage & current module, Con-

ductivity & optical probes, High speed cam-

era imaging & image processing

Others: Octave, SolidWorks, AutoCAD

	Extra-Curricular				
	Teaching Assistant (TA)				
2017					
	• Conducting practical classes in the Autumn semester of 2017-18.				
	Mentor				
2015	Mechanical and Industrial Engineering Students' Society, IIT Roorkee • Demonstrated advanced image processing techniques using MATLAB.				
2015 2016					
2015	Academic Reinforcement Program, IIT Roorkee • Taught Mechanics (PHN-001) and Mathematics (MAN-001) to the freshmen batch in the weekend				
2017					
2016	classes.				
2016	Student Mentorship Program, IIT Roorkee				
2017	o Guided freshmen year students through	buided freshmen year students through the first year of college life.			
	Mechanical & Industrial Engineering Students' Society, IIT Roorkee				
2014	President				
	o Joined as Executive Member in 2014-	Executive Member in 2014-15 and served as Joint Secretary in the year 2015-16.			
	 Organized departmental social events and vocational workshops. 				
	National Service Scheme, IIT Roorkee				
2013	Volunteer				
2014	o Participation in street plays on campus and villages nearby for awareness on socio-political issues.				
	Peer-Reviewed Conference Proceedings
